Highlights

EBITDA was \$6.2 million or 12.6% of sales for the three months ended June 30, 2008. For the three months ended June 30, 2007 EBITDA was \$4.3 million or 12.1% of sales. For a reconciliation of net income to EBITDA please see the Management’s Discussion and Analysis available on SEDAR at www.sedar.com. The increase in EBITDA relative to the prior year comparative period was primarily due to the continued focus at the Dresden mill, towards more non-woven wallpaper base which typically offers higher sales per tonne and higher EBITDA margins.

EBITDA is defined as net income before interest, income taxes, depreciation, amortization, non-operating income and expenses and stock based compensation which the Company considers to be a key performance indicator. EBITDA is not a generally accepted earnings measure and should not be considered as an alternative to earnings or cash flows as determined in accordance with Canadian generally accepted accounting principles. As there is no standardized method of calculating EBITDA, the Company’s use for the term may not be comparable with similarly titled measures used by other companies.
